

I request the FCC reject the National Association of Broadcasters petition 04-160. I am a professional truck driver who frequently travels through major cities. I need immediate and detailed traffic and weather information to help me plan which routes I will use in my travels. I travel throughout the USA and I can not be constantly distracted in my driving to search and search and search for a local radio station and then listen for hours on end in an attempt to hear a brief report of traffic and weather. With XM Satellite radio, I can instantly tune in to traffic reports without having to wait a long time to endure music, chit-chat and news just to eventually get to some bits and pieces of information on the local traffic and weather. I depend on the great information only XM Satellite Radio can provide. I pay a fee for XM Satellite Radio to hear the music, sports, news and traffic and weather information when I want. I do not need the NAB interfering in my right to listen to the format of traffic and weather reports that I prefer - through my XM Satellite Radio!
